

Southfields Primary School Extension

Welcome from the site team

Welcome to the third edition of the Kier Newsletter for the Southfields School project. These regular publications are aimed at keeping you updated with progress on site.

We will highlight recent construction works, as well as what to expect in the upcoming months.

What we achieved over the Summer

We have carried out extensive drainage works in the car park and school perimeter, meaning that the areas will be less prone to flooding.

We have also part demolished Block 3, and created the concrete overslab for the new building.

The biggest change you will have seen is that the steel frame of the new building has now been installed. Over the Autumn and into Winter, you will see this transformed with concrete and bricks to look more and more like a new school.

The footprint of the new building has been excavated to formation.

Upcoming activities over the Autumn

Over the Autumn, we will start installing brickwork, internal walls and services to the new building.

We have selected the bricks to match as closely as possible to the existing buildings' brickwork. Some of the school children have had a chance to sign some of the bricks before they have been fired, meaning that they will forever be a part of their new school building.

Who are we?

Kier Construction operates throughout the UK, and this project is delivered by the Eastern region, and managed out of our Waterbeach Office.

To find out more information about the Eastern region of Kier, please visit our website:

www.kier.co.uk/eastern

How to contact us

Our nominated site contact is Barry Mallott.

t: 07879 848805

Barry can be contacted during normal working hours.

Our contact details are also displayed at the school entrance, should you have any concerns.

Write to us

Alternatively, you can write to us at our Waterbeach office:

Kier Construction
Cambridge Research Park
Waterbeach
Cambridgeshire
CB25 9TN

t: 01223 205 900

Richard German
Contracts Manager

Office-based but attends site regularly.

Barry Mallott
Project Manager

Site based.
Responsible for every day project management.

Scott Brammer
Site Manager

Site based.
Responsible for managing site activities and safety.

David Hodson
Project Quantity Surveyor

Site based.
Responsible for managing cost.

Stewart Bass
Site Engineer

Site based.
Responsible for setting out and quality assurance.

Corporate Responsibility activities

To leave behind a learning legacy, Kier is donating a mini-construction-site play area to the school. This will have play bricks, cones and a sand pit, as well as Personal Protective Equipment like high visibility vests and goggles.

We are looking forward to our Health, Safety and Environment assembly on Monday 14th September.

As a reminder, we have an open evening for parents and neighbours on Wednesday 7th October, where we will discuss the plans for the new building and answer any questions.

Kier is an associate member of the Considerate Constructors Scheme. As part of our commitment, we will do what we can to minimise disruption from the project. If you have any concerns, please do not hesitate to contact us.

Did you know

There has been a tradition of brickmaking in Peterborough from at least the eighteenth century. Bricks are made out of clay, which is dried out, stamped into shape and fired.

Working hours

Our general working hours are 07.30 - 17.00 Monday to Friday. Occasionally, we may work Saturday mornings from 08.00 - 13.00, with pre-agreement from the school.

Deliveries and site traffic

Our deliveries are all planned to avoid the busy school starting and closing times of 08:30 to 09:30, and 14:30 to 15:30. We will hold all deliveries away from site during these times wherever possible.

We will have a full time Gateman at the site entrance to control and direct deliveries. All deliveries are directed straight into site to avoid disturbance and traffic congestion on Southfield Road.

Want to find out more?

We regularly upload photographs and newsletters onto the school website, to give you an idea of how the build is progressing.
